

Join our team as Full Stack Software Developer (m/f/d)

Factworks is an international market research and analytics company with offices in Berlin and San Francisco and an academic connection to the Business School at the University of Geneva. We combine state-of-the-art market research methods and industry expertise with years of consulting experience to help our clients make successful marketing and management decisions.

Since Factworks is currently in a growth phase, we are looking for additional team members to support our 45-person team in our Berlin location.

What you can expect

We offer you an exciting and challenging work environment as a **Software Developer** (full-time) in a **permanent position** in **Berlin**. As our main contact within our two people inhouse development team you'll be managing our innovative internal and external projects with specific practical relevance and in on-going cooperation with our market research teams.

The **range of your assignments** will include:

- Conceptual development, implementation and maintenance of online tools/applications for internal use as well as for clients
- Development, implementation and maintenance of office add-ins and scripts for internal use and workflow efficiency
- Project set up and project management with focus on the technological aspects, e.g. decision on which technology to use, conduct time and cost estimates, establish technical requirements, manage and coordinate project team members
- Set up and administration of the production, staging and development environments
- Evaluation of current technologies as well as further development of the technical infrastructure
- Guidance of and knowledge transfer within the team

What we're looking for

You have completed your **studies** with a high GPA/very good grades in **computer science** or have a **comparable qualification**. You also already have **practical experience** in **software development**. Independent of your age, you enjoy working in an innovative and dynamic company and you are interested in empirical research.

For this role you should have the following **qualifications and skills**:

- Very good knowledge of React.js, Python/Django, HTML and CSS
- Good knowledge of Office.js, JavaScript
- Good knowledge of Linux, webserver configuration and Docker
- Basic knowledge of AWS
- Basic knowledge of Excel, Word and PowerPoint
- Very good command of English
- Basic understanding of German
- Ability to quickly grasp new tasks and think logically as well as conceptually
- Willingness to constantly learn combined with an independent and precise work-ethic
- Passionate about managing projects

We consider your personal development the basis for our growth. Besides competitive compensation you will find that Factworks' culture is based on Excellence, Integrity, Innovation and Team Spirit. That includes ...

 Newest hard- and software	 Advanced internal and external trainings	 Free language classes	 Flexible working hours	 USA option	 Company pension plan	 Working from home option	 Sabbatical option
 Mobile phone option	 Coffee and soft drinks	 Weekly fresh fruit	 Regular team events	 Company outings	 Modern working spaces	 One extra day off on your birthday	 Subsidies for public transport

Want to join our team? Please apply including all application documents and salary as well as benefits expectations directly via our [online application platform](#). We are excited to hear from you!
